Git, Github

PERSONAL PROJECTS

Finance Tracker (React) (04/2022) [🔗](#)

- Built a React app for storing daily expense data
- Worked with firestore for storing data in the backend and firebase auth for user authentication

Admin UI (07/2022) [🔗](#)

- It represents a group of admin users as a display of rows
- Implemented search bar to filter any property, edit or delete rows in place, pagination
- Integrated users API with the list of all users and their properties
- Built using React and Ant Design

Movie Fight App (03/2022) [🔗](#)

- Built an app for comparing two movies depending on the movie database
- Integrated API for getting the movie using an open movie database OMDb API
- Built with vanilla JS

Note Taking App (01/2021) [🔗](#)

- Built a note-taking web application for creating and managing simple notes.
- Synced the notes created by the user in browser's localStorage.
- Designed and implemented all the features from scratch using HTML, CSS, JavaScript & Bootstrap.

Expense Tracker (01/2021) [🔗](#)

- Built a web app to track daily expenses, with totals calculated automatically
- Made it easy to search and sort through the expenses by using a 3rd party library called DataTables.js
- Designed and implemented all the features & wrote logic in JavaScript

Contacts App (05/2022) [🔗](#)

- Built a React app with Infinite scrolling table of contacts using openAPI
- Added filter by search, tag names, messages received and sent
- Built using React, Material UI and Typescript

Personal Portfolio Website (02/2021) [🔗](#)

- Designed and developed and tested a nice & clean portfolio website to share my work and thoughts.
- Built using HTML, CSS and Bootstrap.
